- Issue full-text queries against plain character-based data in SQL Server tables.. The problem is that when I tried logging on sql server 2005 on either laptops, it prompts me to enter a server name and when I type in the name I believe is the server name it rejects it During installation on the two laptops I remember seeing a warning on 1 out of 24 components/setups that sql server2005 installs.. The warning was something to do with Server client This warning never came up when I installed the same version on my desktop.. It is ideal for embedded application clients, light Web applications, and local data stores.
